AN OVERVIEW

Shipbuilding Industry is a technology driven, skill and material intensive assembly operation. It draws upon a large number of services and utilities. The end product is a high value floating asset. Shipbuilding not only spawns industrial entrepreneurship but engenders industrial cluster development as the experience of Japan and Korea demonstrates. For nearly three decades in the post World War II era, shipbuilding industry was dominated by Europe and the US. Shipbuilding being a labour intensive industry, the cost of labour plays an important determinant in a country's competitive position vis-à-vis others. Over the years, the industry has shifted from Europe to Japan and then to Republic of Korea and has now taken firm roots in People's Republic of China. The factors governing this shift have been relatively high wage in Europe coupled with strong competitive strength of manufacturing and steel making sectors and active state support in the leading shipbuilding nations of East & Far East Asia. This decisive shift in shipbuilding activities from Europe to Asia has opened up window of opportunities for Indian ship yards in both public and private sectors.

2. India has a coastline of 7,517 Kms. with 12 Major ports and 205 notified Non-major Ports facilitating sea-borne trade. Coastal and overseas cargo movement is effected through ocean-going vessels. In addition, small ships/crafts also ply on inland waterways and canals. Indian owned ships/vessels carried 7.89% of India's overseas trade during 2015-16. India's emergence as a major economic power would mean greater integration in terms of trade with the rest of the world requiring huge shipping tonnage. As on 31st march 2016, Indian shipping tonnage was 11.43 million Gross Registered Tonnage (GRT) with 1301 ships.

3. With the opening of Indian economy to globalization, there has been a steady increase in handling of cargo traffic at Indian Ports. India's share in global exports has increased from 0.7% in 2000 to 1.6% in 2015 (Source: WTO). To sustain the momentum of foreign trade and improve competitiveness, the country would need adequate and efficient infrastructure in terms of ports, ships and maritime services

4. At the time of independence, there were about a dozen shipyards around Kolkata and Mumbai. At present, there are 27 shipyards, out of which 8 shipyards are in the public sector and the rest are in the private sector. The demand for ships, semi-submersibles and port auxiliary vessels viz new ship building activities as well as ship-repair activities is projected to grow in view of rising cargo traffic from/to India in coming years. The "Manufacturing Plan – Strategies

for Accelerating Growth of Manufacturing in India in the 12th Five Year Plan and Beyond" released by the erstwhile Planning Commission lists "Ship building and Ship Repair" as one of the key sectors of strategic importance.

5. 'Make in India' has been initiated to promote growth of manufacturing sector in the country as it has higher employment multiplier effects compared to service and agriculture sectors. An impetus on shipbuilding and ship repair industry in India is needed for the following reasons:-

(a) The shipbuilding industry has the same impact as infrastructure sectors due to higher multiplier effects on investment and turnover and high employment potential.

(b) The shipbuilding industry is a strategically important industry. To ensure safety of our vast coastline, naval requirement of sophisticated and modern vessels is growing rapidly.

- 6. The Indian Ship-Building Industry can broadly be categorized into following categories:-
 - (i) Large ocean-going vessels catering to overseas as well as coastal trade;
 - (ii) Medium size specialized vessels like Port Crafts, Fishing, Trawlers,Offshore vessels, Inland and other smaller crafts and;
 - (iii) Defence /Naval crafts and Coast Guard Vessels.

7. There are 39 dry-docks for repairing ships in India both in public and private sector as per data reported. These dry docks include the 11 dry docks operated by 7 major ports. The major ports which have no dry-dock facilities are Mormugao, JNPT, New Mangalore, Chennai, Ennore, and Haldia Dock Complex of Kolkata Port.

8. MAJOR SHIPYARDS AND R&D FACILITIES IN THE PUBLIC SECTOR

Cochin Shipyard is strategically located midway on the international sea route, connecting Europe, West Asia and the Pacific Rim. It has evolved into a builder of large size vessels in India for the Merchant Navy and the Indian Navy. This Greenfield shipyard was incorporated in the year 1972 under technical collaboration with M/s MHI, Japan.

- 8.1.1 Some of the notable features and achievements of the shipyard are:
 -) This yard has capacity to build and repair large ships in India shipbuilding up to 1,10,000 DWT and Ship repair upto 1,25,000 DWT.
 - Delivered two of India's largest double hull crude oil tankers each with 92,000
 DWT capacity.
 -) CSL has been selected to construct the first indigenous Air Defence Ship for the Indian Navy. The steel cutting for the ship commenced in April 2005
 -) Yard has developed a complete 3D hull and outfit modeling of thirty thousand DWT Bulk carriers in Tribon.

8.1.2 The percentage shares of income earned by Cochin Shipyard Ltd. from ship building, ship repairing and other activities during 2015-16 are depicted in chart I.

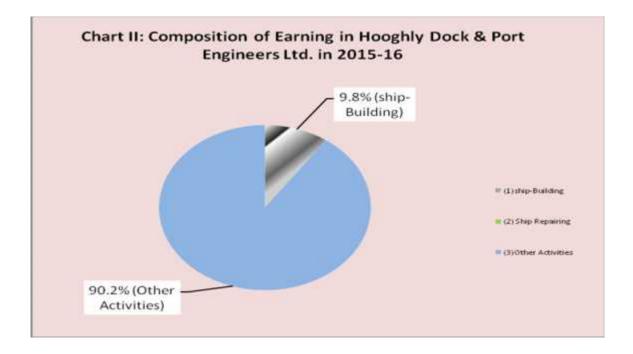

8.2. HOOGHLY DOCK & PORT ENGINEERS LIMITED, KOLKATA (HDPEL)

HDPEL, situated at Kolkata, is one of the oldest shipyards in India. It was established in 1819 in the private sector known as Hooghly Docking & Engineering Company Limited. On merger of the Port Engineering Works with Hooghly Docking & Engineering Limited, the Hooghly Dock & Port Engineers Limited was formed by an Act of Parliament "The Hooghly Docking and Engineering Company Limited (Acquisition and Transfer of Undertakings) Act, 1984"

8.2.1 The Government of India took it over to utilize the available infrastructure and augment the ship building capacity. The nationalized company was with the M/o Industry till July 1986 and thereafter was transferred to the then M/o Surface Transport now (Ministry of Shipping). The company has two production units at Saikia and Nazirgunze in Kolkata.

8.2.2 The percentage shares of income earned by Hooghly Dock & Port Engineers Ltd. from ship building, ship repairing and other activities during 2015-16 are depicted in

chart II. The company is undergoing restructuring process of entering into a Joint Venture with another Shipbuilding company.

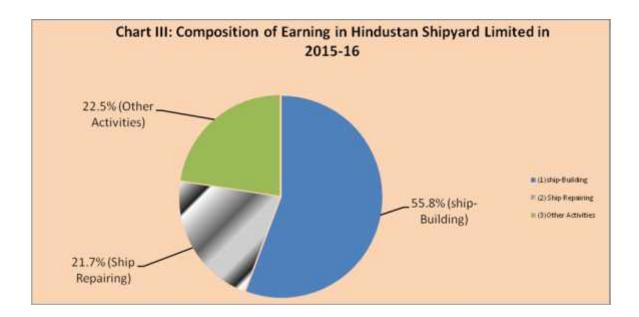

8.3 HINDUSTAN SHIPYARD LIMITED (HSL)

Hindustan Shipyard Limited is located in the east coast of the Indian peninsula, near Visakhapatnam. It is a premier ship building organisation engaged in ship building, ship repairs and offshore and onshore structures. It was established in the year 1941 by Scindia Steam Navigation Company. The Government of India took over the shipyard in the year 1952. Some of the unique features of this shipyard include:-

-) This is the first shipyard in the country to obtain ISO-9001 accreditation for shipbuilding and structural fabrication
-) Regularly imparts training to Graduate Engineers and Diploma holders as apprentices under Apprenticeship Act
-) The yard has capacity to construct and repair ships up to 80,000 DWT each.

8.3.1 The percentage share of income earned by Hindustan Shipyard Ltd. during 2015-16 from ship building, ship repairing and other activities are shown in chart III.

9. NATIONAL SHIP DESIGN AND RESEARCH CENTRE, (NSDRC), VISAKHAPATNAM

NSDRC is a Registered Society under the Registration of Societies Act XXI of 1860. In 1989, it came under the administrative control of the Ministry of Shipping is managed by a Governing Body with Secretary (Shipping) as the Chairman. The centre has become fully operational since May, 1993. NSDRC is designed to provide support to the Indian Shipbuilding Industry in the field of Ship Design, research in hydrodynamic structures, ocean water transport economy etc. The IMU Visakhapatnam Campus emerges from the confluence of the centrally established Indian Maritime University at Chennai, and the National Ship Design and Research Centre (NSDRC), India's premier ship design and maritime research institution. Pioneered in the early 90's by the Government of India to pilot and consolidate national domain knowledge with global vision, NSDRC has undertaken several milestone projects in the areas of Ship Design, Construction and Applied Research. Therefore, IMU Visakhapatnam Campus heralds the integration of visionary academic insight with the accumulated professional expertise and knowledge base on Ship Design and Maritime Technology.

10. MEASURES TO PROMOTE DOMESTIC SHIPBUILDING & REPAIR

A number of measures have been initiated by Ministry of Shipping to improve the viability of the ship manufacture and ship repair industry and encourage private sector participation, with emphasis on:

10.1 RESEARCH

The Department of Shipping has a scheme for providing grants-in-aid to educational and research institutions for carrying out Research and studies in shipbuilding. Since the 8th Plan eleven R&D projects have been executed under this scheme.

10.2 SUBSIDY AND BUDGETARY SUPPORT TO INDIAN SHIPBUILDING INDUSTRY

(a) Prior to the introduction of the scheme of payment of subsidy directly to the Public Sector Shipyards in 1981, a "Pricing Policy" existed since 1971, as per which the price of the vessels built by Indian Public Sector Yards was fixed by the government based on the valuation made by three international valuers. This was called the "International Parity Price" where the ship-owner would pay the international price and an additional 5% of the above towards partial cost of import substitution. In addition, Government would also pay the yard 5% towards the price differential of certain major components. Ship owners would also pay escalation due to statutory rise of price of controlled items, variations in customs duty and increase in wages.

(b) In 1981, Government brought in a major change in the policy wherein a subsidy equivalent to 20% of the International Parity Price was payable directly to the shipyard and the ship owners paid an additional 10% of the international parity price towards partial cost of import substitution.

(c) In 1997, Government further amended the subsidy scheme, applicable to both domestic and export orders, as follows:

(i) The yard was to participate in an open <u>global</u> tender and was to be permitted to match the lowest bid and in the case of a negotiated price the *modus operandi* was to be worked out by Ministry of Shipping in consultation with Ministry of Finance.

(ii) Fixation of price was to be in US\$ /JPY and payment was to be in INR at the exchange rate applicable on the date of payment.

(iii) Ships for which the import component was likely to exceed the price of the vessel would not be built indigenously.

(iv) Indian owners were to be permitted to raise External Commercial Borrowings.

(d) The above scheme was again further amended in 2002 extending the scheme to non-Central Public Sector shipyards and Private sector yards also with the stipulation that subsidy was to be calculated on the price at which the yard won the global tender and in case of price negotiation, a "Price Reasonableness Certificate" would have to be obtained from Director General of Shipping and based on which an "In Principle Approval" was to be issued by Ministry of Shipping. The Scheme was applicable up to August 14, 2007. The subsidy disbursed to Shipbuilding activity from 2002-03 to 2015-16 is presented in **Tables 1 and 2** below:-

10.3 The Government of India has introduced a Rs. 4000 Crores Shipbuilding Financial Assistance Policy for 10 years to encourage domestic shipbuilding. Financial assistance will be granted to Indian Shipyards equal to 20% of the lower of "Contract Price" or the "Fair Price" of each vessel built by them for a period of atleast 10 years commencing 2016-17. This rate of 20% will be reduced by 3% every three years. The quantum of financial assistance for a vessel shall be the product of the applicable rate of financial assistance prevailing on the date of Contract, and, the lowest of the contract price or the fair price when converted in Indian Rupees: Provided that, at the time of release of financial assistance, if the actual payment received for a vessel is lower than the contract price, such payment shall replace the contract price in the formulae for computation of the financial assistance.

INDIA'S SHIP-BUILDING INDUSTRY

INDIA'S SHIPBUILDING INDUSTRY

SHIPBUILDING CAPACITY:

1.1. Ship building capacity of a unit is defined in terms of the maximum carrying capacity of the ship that can be built by a shipyard measured in terms of Dead Weight Tonnage (DWT) which is the number of tonnes (one tonne = 2240 pounds) of stores, fuel and cargo that a ship can carry.

1.2. Amongst the public sector companies, Cochin Shipyard Ltd. possessed the maximum size of ship building capacity (110 thousand DWT) followed by Hindustan Shipyard Ltd. (80 thousand DWT), Alcock Ashdown Ltd (15.00 thousand DWT) and Goa Shipyard Ltd. (4.50 thousand DWT). Charts IV and V present the ship building capacity (in terms of their DWT) of some of the big shipbuilding companies as on 31st March 2016 in public & private sector.

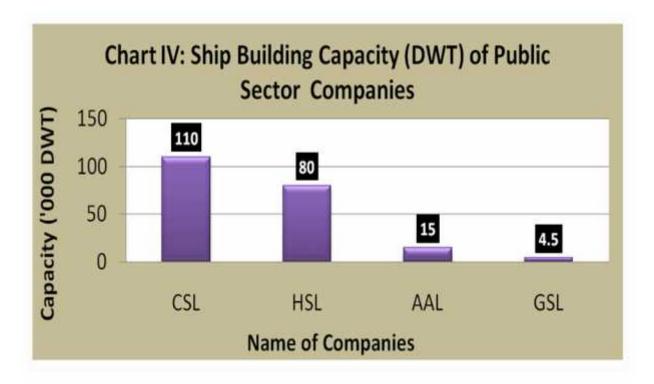

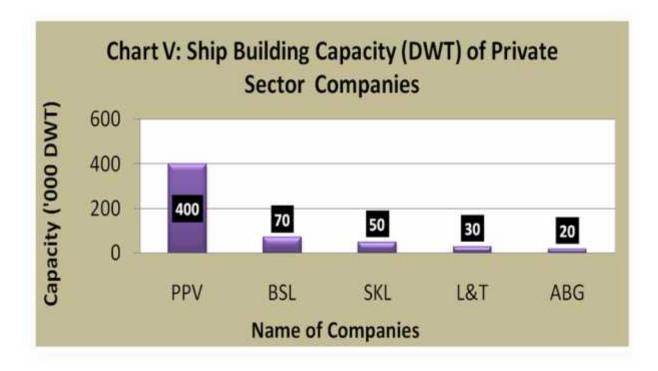

Table 1.1 gives detailed company-wise maximum size/ capacity of shipbuilding by public sector and private sector companies.
